

Established in the early nineties, CQS Technology Holdings is one of South Africa's leading software houses specialising in the design, development and deployment of software products and the provision of professional services for the audit, risk management, financial services and corporate performance management markets.

Our delivery capability is focused on supplying quality products and services to over two thousand customers. Our talented team, combined with state of the art infrastructure, allows us to provide our clients with innovative solutions for diverse technology requirements.

The CQS client footprint extends up into Africa and includes Kenya, Nigeria, Namibia, Botswana, Malawi, Tanzania, Zambia and Uganda.

Methodware

Methodware is a world leading producer of Risk Management and Internal Audit software. Methodware has been developing and distributing risk management and internal audit software solutions internationally since 1993.

The company's mission is to improve the effectiveness of customers' assessment processes through the application of risk management and internal audit software tools. Methodware's adaptable, powerful and user-friendly software solutions make assessment simple for organisations of all sizes and types, from small companies with a single risk manager, to large multi-national organisations with a group risk management function and international teams of auditors.

Regardless of your organisation's size and needs, our powerful and user-friendly tools will simplify your assessment process. These solutions incorporate/are consistent with internationally recognised risk management and internal audit standards, methodologies, recommendations and legislation, including the Sarbanes-Oxley Act of 2002 and Basel II.

The list of over 1000 clients using Methodware's software encompasses the public sector, financial services, engineering and manufacturing, retail and telecommunications.

ProAudit Advisor

Capture the Audit information you need, in an easy to use and intuitive software product.

Incorporating international best practice, PPro Audit Advisor makes it easier to conduct an audit, and faster to generate, report and graphically present audit results. PPro Audit Advisor enables you to:

- Spend more time auditing and less time recording;
- Manage audit findings and recommendations within a single database;
- Audit using either a process/risk based approach or a traditional program steps focus;
- Design an audit report with bite, then use it as a template for future reporting;
- Provide better feedback to your audit customers, with improved report turn-around and flexible graphing;
- Analyse and understand audit results with powerful sort and filter functions.
