

ContinuitySA – Business Continuity is a fundamental component of any sound corporate governance program and is essential to any organisation determined to prove that its “compliance” program is in place. Our company offers a BCM measurement service such that a Board can have proof that its critical business divisions are compliant and conform to the current internationally accepted standards such as BS25999.

ContinuitySA is your back-up plan and disaster management solution. ContinuitySA offers a comprehensive platform to ensure minimal downtime when disaster strikes. Our team of highly skilled and qualified industry experts help clients to prepare for and deal with potential threats to the optimal functioning of their business as a result of unforeseen or sudden disruptions due to human error, civil unrest, political acts or natural events.

ContinuitySA has always adhered to the best practices of local as well as international standards for Business Continuity. We currently have twenty-five members of staff who are accredited with the UK Business Continuity Institute; four of which are Fellows of the Business Continuity Institute and eight of which are Members of the Business Continuity Institute.

We have completed a number of Consultancy projects for some of the largest organisations in the South Africa as well as in Botswana, Mauritius, Ghana, Uganda, Ivory Coast, Namibia, Mozambique, Qatar, Bahrain and Kenya.

ContinuitySA also boasts the largest recovery facilities in Southern Africa. We have a number of recovery centres in South Africa with over 20000sq/m of recovery facilities in Midrand, Gauteng, as well as a site of 5000sq/m in Randburg, Gauteng. A smaller site of 3000sq/m is located in Bellville, Western Cape. The company has already established a 1500sq/m site in Gaborone, Botswana and are in the process of further expanding business into Africa and surroundings. ContinuitySA’s Work Area Recovery capability in Southern Africa alone can accommodate in excess of 3500 seats. We’ve also recently acquired SunGard Availability Services SA and are furthermore twice the size of our nearest competitor. This, together with our Business Continuity Institute (BCI) qualified staff, 20 years of experience as well as our knowledge of the Financial, Mining, Manufacturing, Telecommunications and other industries – both local and international, make us Africa’s leading business continuity management company.
